1165.01 PURPOSE

The purpose of this Chapter is to provide standards for signs to safeguard life, health, property, safety, and public welfare, while encouraging creativity, variety and compatibility, and enhancement of the Municipality's image. Signs shall be regulated relative to time, place, and manner. The individual user's right to convey a message must be balanced with the public's right to be free of signs which unreasonably distract drivers and pedestrians. This Chapter is based on the premise that signs are subject to control as much as noise, odor, debris, and other similar characteristics of land use, and that if not regulated, can become a nuisance to adjacent properties or the community in general, or depreciate the value of other properties within the community. The provisions of this Chapter are intended to:

(a) Encourage creative and well-designed signs that contribute in a positive way to the Municipality's visual environment, express local character, and help develop a distinctive image for the Municipality;

(b) Encourage signs that are responsive to the aesthetics and character of their particular location, adjacent buildings and uses, and the surrounding neighborhood. Signs should be compatible and integrated with the building's architectural design and with other signs on the property;

(c) Prevent or limit traffic or pedestrian accidents, injuries, deaths, and property damages resulting from obstructed vision, distraction, or confusion to the public due to the undue proliferation of signs;

- (d) Encourage a healthful economic and business environment in the community;
- (e) Limit the height and size of signs to those that are appropriate in scale to the community; and,
- (f) Provide adequate way-finding signage for motorists and pedestrians.
- (g) Reduce visual clutter.
- (h) Minimize the risk of damage and injuries from signs that are structurally unsafe.
- (i) Prevent blight characterized by oversized, overcrowded, abandoned, obsolete, and/or dilapidated signs.
- (j) Protect the public's right to receive information protected by the First Amendment of the United States Constitution.

1165.02 APPLICABILITY

(a) Generally - Except as otherwise provided in this Section, all signs placed, erected, installed, painted, modified or altered shall conform to the standards set forth in this Chapter and shall require permits in accordance with Section 1165.10 of this Chapter. Erection, modification, alteration, placement, replacement or other action involving a sign that is in any way inconsistent with this Chapter 1165 shall be a violation of the Zoning Code and subject to penalties and remedies as permitted by the Kent Codified Ordinances, *including penalties set forth for Civil Infractions as stipulated in Section ????* of the Kent Codified Ordinances..

(b) Sign Standards - The sign standards provided in this Chapter are intended to apply to signs in each zoning district in the Municipality. Only signs authorized by this Chapter shall be allowed.

(c) Existing Signs: Continuance - Except as otherwise specifically provided, nothing in this Chapter shall require removal or discontinuance of an existing on-premises or existing off- premises sign. No existing signs shall be enlarged or extended without meeting the requirements of this Chapter and obtaining a Sign Permit. Such nonconforming signs shall not be enlarged or extended and these signs shall be deemed a nonconforming sign under the terms of the Zoning Code.

(d) Nonconforming Signs -

(1) Any legal nonconforming sign, as defined in Section 1165.03, may be continued in use if maintained in accordance with this sub-section. Temporary signs shall not be considered legal, non-conforming signs.

(2) All pre-existing illegal nonconforming signs must be removed in accordance with this sub-section. The Zoning Inspector shall issue an order for the sign to be removed within fifteen (15) days. The cost of removal will be assessed to the property owner. If the property owner refuses to pay for removal of the sign, the cost of such removal shall be assessed to the property owner's tax records.

(3) Any nonconforming sign displayed on the premises shall be removed or brought into conformance with the provision of this Chapter before a permit for a new sign may be issued.

(4) A legal nonconforming sign shall immediately lose its legal nonconforming designation and shall be immediately brought into compliance with this Chapter including obtaining the required permits and approvals as set forth herein. Such signs shall be removed upon any of the following occurrences:

A. The nonconforming sign is structurally altered, enlarged, relocated, or replaced.

B. The nonconforming sign is determined by the Zoning Inspector or the Chief Building Official to be in a dangerous or defective condition; to fail to conform to health and fire codes; a public nuisance; or abandoned, deteriorated; or in need of repair or replacement.

C. The nonconforming sign face and/or supportive structure is destroyed or damaged in excess of fifty percent (50%) of the combined replacement value of the sign and supportive structure, by any cause.

D. Upon the discontinuance of the present use of property for which the sign was intended for a period of more than six (6) months.

(5) A nonconforming sign shall not be moved in whole or in part to any other location unless such sign is made to conform to this Chapter. If an owner is forced to move a nonconforming sign by Municipal, state, or federal officials for any reason other than enforcement, such sign shall maintain its nonconforming status, but must still adhere to the setback requirements.

(6) Nothing in this section shall prevent the ordinary repair, maintenance, and non-structural alteration of nonconforming signs. Maintaining the nonconforming sign to the exact legal nonconforming design shall be allowed; however, any proposed changes to a nonconforming sign, except for re-facing an existing sign, shall require that the sign be made to conform to the requirements of this Chapter. Re-facing an existing nonconforming sign shall not be considered an alteration as long as the re-facing constitutes an exact replica of the existing sign face. The design, color scheme, translucency, graphics and text font must exactly match those existing.

No structural alterations shall be made in, to, or upon such nonconforming sign, except those required by law to make the sign conform to the requirements of this Chapter.

1165.04 GENERAL REQUIREMENTS FOR ALL SIGNS AND DISTRICTS

(a) Signs in Public Rights-of-Way - Except as provided, no sign shall be placed or deposited within any public right-of-way or on any tree, pole, post, meter, or similar object located within the public right-of-way. Under no circumstance may any signs that are permitted in the right-of-way interfere with vehicular or pedestrian visibility. Signs interfering with vehicular sight distance and visibility are prohibited unless they fall under subsection (1) below.

(1) The following signs may be installed in the public rights-of-way without a Sign Permit:

- A. Signs conforming to the Manual of Uniform Traffic Control Devices;
- B. Signs required by a state or federal statute;
- C. Signs required by an order of a court of competent jurisdiction;
- D. Public directional and safety signs.

(2) Blade signs attached to a building may project a maximum of forty inches over a public right-of-way provided the lowest part of the sign is at least eight feet but no more than fifteen feet above the pedestrian thoroughfare and provided said sign has received a Sign Permit from the Zoning Inspector.

(b) Colors - Not more than three (3) colors may be used per sign. For purposes of this Section, white shall not be considered a color. Neon and fluorescent colors are prohibited.

(c) Lettering Styles and Sign Coverage - No more than two letter styles or more than three sizes of letters are permitted per sign. Letters may not occupy more than seventy-five percent (75%) of any sign panel.

(d) Measurement of Sign Area -

(1) The surface area of a sign shall be calculated by enclosing the extreme limits of all lettering, background, emblem, logo, representation, or other display within a single continuous perimeter composed of squares or rectangles with no more than eight lines drawn at right angles.

(2) Supporting framework or bracing that is clearly incidental to the display itself shall not be computed as sign area unless it too contains advertising lettering, materials or symbols.

(3) Double-faced (back-to-back) signs shall be regarded as a single sign only if mounted on a single structure, and the distance between each sign face does not exceed two (2) feet at any point. Only one face of an identical double-faced sign shall be measured when determining maximum allowable area.

(4) Where a sign consists of one or more three-dimensional objects (i.e., balls, cubes, clusters of objects, sculpture, or statue-like trademarks), the sign area shall be measured as their maximum projection upon a vertical plane.

(5) Regardless of their spacing, the letters forming a word or name shall be considered a single sign. The area of such a sign shall be measured as provided in this Chapter.

(e) Measurement of Sign Height - The height of a sign shall be computed as the distance from the base of the sign at a computed grade to the top of the highest attached component of the sign (including the sign face, sign structure, or any other appurtenance). The computed grade shall be the elevation of the nearest point to the proposed sign location of the crown of the nearest public street providing access; or the grade of the land at the principal entrance to the principal structure on the lot, whichever is higher.

(f) Alterations - No sign shall hereafter be altered, rebuilt, enlarged, extended or relocated except in conformity with the provisions of this Chapter. The repainting of signs shall not be deemed to be an alteration within the meaning of this Chapter.

(g) Sign Maintenance - Signs and supporting hardware shall be structurally safe, clean, free of visible defects, and functioning properly at all times. Visible rot or rust, exposed lighting sources or wires, falling parts, or broken and missing parts are evidence that a sign is in a state of disrepair. Repairs to signs shall be equal to or better in quality of materials and design than the original sign.

(h) Notice to Repair - When the Zoning Inspector determines that such a sign exists in a state of disrepair, the Zoning Inspector shall issue to the owner of the sign and the owner of the real estate a notice of such disrepair and the need for corrective action. Any party receiving such notice may appeal the notice to the Board of Zoning Appeals in accordance with Chapter 1115 (*proposed Chapter 1109*) of the Zoning Code. If such an appeal is not filed within fifteen (15) days of the date on which the notice is sent, persons receiving the notice shall be responsible for repairing the sign or otherwise bringing it into conformance with this Chapter. The repair work shall be accomplished within thirty (30) days of the date of the notice, unless the person undertaking the work files a request with the Zoning Inspector for an extension. If such request shows diligence and good faith such as ordering materials or signing a contract with a licensed contractor, the Zoning Inspector shall grant an extension of thirty days for completion of the work. If an appeal is filed in accordance with the Board of Zoning Appeals, the time for performance shall be delayed until resolution of the appeal. If the Zoning Inspector finds that the lack of repair constitutes a danger to persons or to property other than that of those persons receiving the notice, the Zoning Inspector shall so state in the notice and the Municipality may seek immediate relief under the Building Code or under the laws of public nuisance.

(i) Sign Removal or Replacement - When a sign is removed or replaced, all brackets, poles, and other structural elements that supported the sign shall also be removed. Affected building surfaces shall be restored to match the adjacent portion of the structure.

(j) Sign Attachment and Support - No sign shall be attached to or supported by a tree, utility pole, light pole, trash receptacle, bench, vending machine, gasoline pump or hose, or public shelter, nor shall such sign be painted or drawn upon rocks or other natural features.

(k) Changeable Copy Signs - Manual or electronic changeable copy signs shall be permitted on permanent freestanding signs and building signs only. Manual copy signs shall comprise no more than twenty percent (20%) of the total area of the sign. The changeable copy portion of the sign will contribute toward the maximum sign area.

In order for the refund to be issued, the Cash Deposit must still be in place (not forfeited by non-compliance), the site must be in compliance with the approved Plan at the time of refund, and a new Cash Deposit be provided to the City by the new property owner. The new property owner shall also include a signed statement from the new property owner indicating that they have received a copy of the approved Plan and agree to comply with it, unless they submit and receive approval for a revised Comprehensive Sign Plan.
