

**BOIL ALERT
EFFECTIVE IMMEDIATELY**

WATER BREAK

BOIL WATER BEFORE DRINKING

Please BOIL all water used for drinking or cooking before using!

This ORDER is in effect for the following section of the City of Kent:

**The area to the North of Fairchild Avenue
East of Wheeling and Lake Erie Rail Road Tracks (Fish Creek) and
West of the Cuyahoga River including all of the River Bend Subdivision
(The entire River Bend Subdivision both East and West of the river)**

A break in a 12 inch water main caused depressurization of the water distribution system in the affected area. Water service is currently in the process of being restored. It is estimated that the repairs will be made within four to six hours. Upon restoration of water service, the water should not be used for drinking or food preparation until further notice.

Boil water vigorously at or near 212 degrees F (100 Degrees C) for one full minute to kill any disease causing bacteria that may be present in the water. (A microwave oven may be used to boil the water)

The City will issue another notice when water tests are completed to insure that the water is safe for drinking. Water test procedures take a minimum of 30 hours after service is restored.

For further information residents may contact the Department of Public Service at 330-678-8105, or tune into radio station 1620 AM for updated information.

Please accept our sincere apology for the inconvenience caused by this untimely water service disruption.

This ORDER issued at 4:00 PM, Monday, November 23, 2009.

**Eugene K. Roberts, P.E.
Director of Public Service**
